

VEHICLE TRAVEL DURING COVID-19

1. Travel alone in your own vehicle if possible to avoid cross contamination
2. Disinfect your vehicle beforehand by wiping down the surfaces, especially arm rests and door handles and all contact surfaces
3. When travelling alone is not possible, restricting the number of employees in the vehicle e.g. having one employee seated in the front of the vehicle and one in the rear of the vehicle
4. If more than two employees are travelling in a vehicle, then wearing PPE including masks and gloves is required to reduce exposure and surface contact
5. Open the window a crack to provide fresh air into the vehicle cabin
6. Don't share items; phones equipment etc.
7. Once travel has been completed disinfect the vehicle again
